

Brownfields 2012 Assessment Grant Fact Sheet

Troutdale, OR

EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfields. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed to help states and communities around the country cleanup and revitalize brownfields sites. Under this law, EPA provides financial assistance to eligible applicants through four competitive grant programs: assessment grants, revolving loan fund grants, cleanup grants, and job training grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Assessment Grant

\$200,000 for hazardous substances

EPA has selected the City of Troutdale for a brownfields assessment grant. Site-specific hazardous substances grant funds will be used to perform an assessment of the Troutdale Riverfront Redevelopment site at 302 NW 257th Way. The site, which sits on the bank of the Sandy River, operated as a slaughterhouse and rendering plant from 1901 to the late 1960s. Grant funds also will be used for community outreach and cleanup planning activities.
